## Claims

1. A fitting for attaching a louvre and/or a voile to a hanger comprising a one piece plastics moulding comprising two leaves, connected by a hinge moulded integrally between the two leaves.
2. A fitting as claimed in claim 1 comprising first means for supporting a louvre and second means for attaching a voile to the fitting.
3. A hanging fitting for a vertical louvre, said fitting comprising first means for supporting the louvre and second means for attaching a voile to the fitting.
4. A fitting as claimed in claim 2 or 3 wherein the voile attachment means allows the voile to be detached from the fitting.
5. A fitting as claimed in claim 4 wherein the voile attachment means comprises one or more releasable fasteners.
6. A fitting as claimed in claim 5 wherein the voile attachment means comprises at least one hook and loop fastener.
7. A fitting as claimed in claim 5 or 6 wherein the fastener is bonded to the fitting, preferably being provided with an adhesive backing.
8. A fitting as claimed in any of claims 3 to 7 wherein the fitting is generally planar and the voile attachment means is provided on one or both faces of the fitting.
9. A fitting as claimed in any preceding claim wherein the fitting comprises two parts which engage around the top of the louvre.

- 9 -

10. A fitting as claimed in claim 9 wherein the fitting extends substantially over the entire width of the louvre.
11. A fitting as claimed in claim 9 or 10 wherein the said parts comprise leaves  
5 which sandwich the top of the louvre between them.
12. A fitting as claimed in any of claims 9 to 11 wherein the two parts are hinged together.
- 10 13. A fitting as claimed in claim 12 wherein the fitting is a one piece plastics moulding with a hinge moulded integrally between the two parts.
14. A fitting as claimed in any preceding claim further comprising means to attach it to a hanger.
- 15 15. A fitting as claimed in claim 14 wherein the hanger attachment means comprises an eye.
16. A fitting as claimed in claim 14 or 15 wherein the fitting is provided with a  
20 recess in its upper end, and the hanger attachment means is arranged in or adjacent the base of that recess.
17. A fitting as claimed in claim 16 wherein the voile attachment means is arranged such that the voile extends across, and covers, the recess.
- 25 18. A fitting as claimed in claim 17 wherein the voile attachment means is provided on either side of the recess.
19. A fitting as claimed in claim 18 wherein the voile attachment means is also  
30 provided below the recess.

- 10 -

20. A fitting as claimed in any preceding claim further comprising clip means for attaching the fitting to the louvre.
21. A fitting as claimed in claim 20 wherein said clip means is formed integrally with the fitting.
22. A fitting as claimed in any preceding claim comprising one or more posts which extend through openings provided in the louvre to support the louvre.
23. A fitting as claimed in claim 22 wherein the or each post is at least part circular in section to avoid stress concentrations in the louvre.
24. A fitting as claimed in claim 22 or 23 comprising two posts spaced apart.
25. A fitting for attaching a louvre to a hanger comprising a plurality of posts for extending through corresponding openings in the louvre to support the louvre.
26. A fitting for attaching a louvre to a hanger comprising two leaves for receiving the louvre between them and means for clipping the two leaves together to retain the louvre.
27. A vertical louvre blind comprising a hanging fitting for hanging from a head rail, a louvre blind mounted to fitting and a voile mounted to the fitting.
28. A fitting for attaching a voile to a hanger, said fitting comprising means for releasably attaching the voile to the fitting.
29. A voile for attachment to a hanging fitting, said voile having releasable fastener means provided at spaced locations along its upper end to fasten opposed sections of voile together.

- 11 -

30. A fitting for attaching a louvre and/or a voile to a hanger comprising a one piece plastics moulding comprising two parts, connected by a living hinge
